

NORTHERN

Orthopaedics

a department of Northern Regional Hospital

At Northern Regional Hospital, we are proud to bring you access to high- quality healthcare through our outpatient department, Northern Orthopaedics.

We have reorganized Northern Orthopaedics to be a hospital –based outpatient department to recognize and promote the increasing collaboration between our hospital and our physicians to better serve your health care needs.

Your visit to Northern Orthopaedics is considered a “provider –based clinic visit” rather than a “physician office visit.” If you are a Medicare or Medicaid patient, this means that you will see two separate charges for the services you receive from us today. The first charge will be from Northern Orthopaedics and will cover only your physician’s professional service fees. The second charge you receive will be from Northern Regional Hospital and will cover the costs of providing outpatient services as a provider based clinic.

If you are commercially insured or self-pay, you will not notice a difference in your billing.

Thank you for choosing Northern Orthopaedics and

Northern Regional Hospital!
